

CAMPUS BEAUTIFICATION

Commemorative Tree Planting Program

A vital component of the larger campus efforts involving sustainability, the Commemorative Tree Planting Program coincides with the Institute's Master Plan to more than double the campus tree canopy coverage, with a goal of 55 percent. The program enables the Institute to replace lost trees and enhance the character of the campus by providing shade and seasonal color.

Within this program, individuals or groups may fund the planting of a tree as a memorial to living or deceased alumni, families, and friends connected with the Institute or to commemorate a special event or activity. To permanently acknowledge those who have been recognized through the program, a bench will be placed near all commemorative trees, with the option of a personalized plaque. A list of trees and bench types, along with planting locations, will be provided for donors from which to select, with the final decision being made by Capital Planning and Space Management. A one-time gift of \$10,000 is required to fund a commemorative tree and bench, ensuring proper maintenance of both as long as practicable.

"Gretchen" full bench

"Gretchen" backless bench

"Plainwell" bench
